

British Science Week 2023

What was happening in your class?

6 Beech: we had a 'Drop Down Day' about space (Year 5) and we watched a theatre production about climate change. We researched an American female scientist.

Year 1 -
Materials
presentation
from John
Veall.

2 Holly - Planned bug hotels. Read about famous scientists. Evaluated experiment started in previous week. Science lesson.

Completed science DDD on digestion and planets Zoom presentation Year 5

4Beech - Rocks dropdown day, Alexander Graham Bell, Mae Jemison, STEM pioneers, Ada Lovelace, Jane Luu.

Our children made some 'Bug Hotels'! 2 Beech

Y6 - 'Drop Down Day' about space (from Year 5) and we watched a theatre production about climate change. 6 Oak

4 Holly: we had a 'Drop down day' about rocks (year 3) and watched a theatre production about saving wild life and the planet. We read about a female scientist.

4 oak Drop down day and discussion about importance of enquiry

Wrote a biography about Katherine Johnson. Y5

2 Oak Planned bug hotels, not enough resources were sent in to make them. Resent message to parents and will complete after Easter. Looked at experiments on you tube.

3Oak - We watched a live BBC Schools video linked to our topic of 'Forces.' We also completed a 'Friction' quiz and conducted an experiment with a toy car and a ramp.

What did the children think?

I was interested but I knew that that was a copper pipe before he told us! Lacey - 1 Oak

I enjoyed looking at the materials with Mr Veall
Scarlett 1 Holly

"We liked our space task because we worked as a group and we learned new facts about the planets. We did some good drawings," Wajeer & Nevaan 6 Beech

"I liked learning about scientists" 2 Holly

The children absolutely loved making the 'Bug Hotels'! 2 Beech

"Amazed by Katherine Johnson and her IQ!" Year 5

Freddie 6 Oak - I liked the climate show because it was funny and we learnt about climate change.

Keira 4 Holly - I loved it. I enjoyed looking at the different rocks and tried to touch as many rocks as I could.
Thomas 4 Holly - I found the production funny and learnt a lot about climate change.

Aven 6 Oak - I liked the science DDD because we all got to work together as a team and then share our work with the class. It helped me remember facts about the planets.

Lano 4 Holly - I thought the rocks were pretty interesting, they all looked very different.
Tiffany 4 Holly - It was interesting, learnt a lot about what the sea needs.

"I loved it! Absolutely awesome. Space is so cool!" Keeley 5H

I enjoyed learning about how Mr Veall bend the pipes. Lincoln 1 Beech

"We really liked the performance because it was entertaining. We feel like it gave us a message to those who don't really care about climate change." Robyn & Paige 6 Beech

It was really fun watching the production and I learnt a lot about recycling- Abi 6 Holly

Wow,
that's so cool! 2 Oak

3Oak - We enjoyed the experiment with the car and ramp because it was practical and that helped us to understand the force of friction.
