

Tables Track

How to play

2-4 players

- Players put their counters in a row on the middle spaces and START.
- Players take turns to roll the dice and move one counter round the track at a time.
- If a player lands on a multiplication fact, that counter can be placed on a corner circle with the answer. A new counter is moved to START ready for this player's next turn.
- A player can only have 1 counter in a corner and counters cannot be moved once placed.
- The first player to use all 4 counters (1 in each corner) is the winner.

You need:

a dice
4 counters for each player
